

How to Avoid Getting Doored?

THE DOOR ZONE:

The three or four feet next to parked cars in which you could get hit by opening doors.

Why you might ride in the door zone:

FASTER THAN TRAFFIC

You ride faster than traffic, and the only room to pass lies within the door zone.

BIKE LANES

The street has a bike lane that runs alongside parked cars—putting you right in the door zone.

PASSING STOPPED CARS

A taxi or delivery vehicle stops in traffic, so you pass on the right.

How to keep from getting doored:

SAFEST: RIDE OUTSIDE THE DOOR ZONE

Always ride at least three feet from parked cars. And when riding in a bike lane, ride at the left edge of the lane.

VIGILANT: LOOK INSIDE EACH PARKED CAR BEFORE YOU PASS IT. THEN:

- If you can see inside and spot no occupants, *pass in the door zone.*
- If you can't see inside, or you spot someone inside, *move outside the door zone, or slow down and pass carefully.*
